

## Features

- Digital Picture Frame
- Medication Reminders
- Appointment Reminders
- CareText™ Email Platform
- One-Touch Call Me Function
- Bluetooth Motion Detection
- Supports Video Conferencing
- WiFi enabled

## Connecting Families. Caring for People.

CareConnect™ was primarily developed to focus on seniors who are living independently, either by choice or circumstance, and who are not tech savvy. For many seniors, continued healthy living comes from staying connected. The features, user experience and capabilities of CareConnect™ are derived from a deep understanding of the elderly population. Knowing they have support from and access to those concerned about their wellbeing and healthcare, as well as peace of mind for family members, friends, and caregivers, is the design hallmark of CareConnect™.
